

SOLE PACK PADDIES

STABLE MANAGEMENT

ANTI-BACTERIAL, ANTI-FUNGAL HOOF PACKING PASTE FOR HORSES.

ACTIVE CONSTITUENTS

Pine tar 38.12%w/w, Potassium iodide 1.3%w/w,
Iodine 1.82%w/w.

Features

- Fast acting, rapidly penetrating anti-bacterial and antiseptic emollient paste.
- Beneficial in any condition which results in penetration of the hoof wall, sole, frog, white line and exposure of the sensitive elements of the foot to infection.

Benefits

- Beneficial for a wide range of hoof related conditions such as relief of dry/sore/hard feet and control of local bacterial and fungal infections in the foot during treatment.
- Treats 'white line' infections.
- Maintains hoof pliability which aids in the expansion and contraction of the foot.

DIRECTIONS FOR USE/CONTRAINDICATIONS

Open protective plastic covering and remove the treatment pad enclosed in the cushioned treatment wrap.

Abscesses; Cut out abscess then pack incision with Sole Pack and bandage hoof and/or apply hoof pad and shoe.

For bandage application; Clean foot thoroughly. Unfold ends of the cushioned treatment wrap and position the Sole Pack treatment pad on the foot, using fingers to work the paste into the cavities. Fold end of cushioned treatment wrap smoothly over the hoof wall and bandage normally. Alternatively, cover the hoof with a polypropylene boot.

DURATION OF TREATMENT

Sole Pack hoof packing paste may be left in place overnight for up to 18 hours, at which time the packing should be removed and the foot re-examined. New Sole Pack hoof packing paste may be applied daily until all signs of infection have resolved or until the desired pliability has been restored. Following this, application may be continued 2-3 times per week. The total duration of treatment should not exceed 6 weeks.

PACK SIZE(S)

12 individually wrapped Sole Pack dressings per carton.
